“Emerging Viruses: Disease Models and Strategies for Vaccine Development”

A symposium in honor of CJ Peters, MD

**October 23-24, 2012
Moody Gardens Hotel
and Convention Center
Galveston, TX**

Sessions include:

- **Discovery of viruses and pathogenesis**
- **Viruses and their interactions with the immune system**
- **Animal models for vaccine development**
- **Development of new vaccines**
- **The discovery phase of basic vaccinology, including elucidating the immune response to vaccination**

Confirmed speakers:

- **Sherif Zaki** (CDC)
- **Diane Griffin** (Johns Hopkins)
- **Heinz Feldmann** (NIH/NIAID)
- **George Georgiou** (UT Austin)
- **Michael Diamond** (Wash U)
- **Tom Geisbert** (UTMB)
- **Connie Schmaljohn** (USAMRIID)
- **Slobodan Paessler** (UTMB)
- **Fred Murphy** (UTMB)
- **Stephen Barthold** (UC Davis)
- **Alan Rothman** (U of Rhode Island)

Travel awards will be available for junior-level faculty (i.e., persons within two years of completing their postdoctoral fellowship) and trainees (postdoctoral fellows and students). Travel awards for junior-level faculty and trainees who are women, minorities, or persons with disabilities will also be offered.

Details will be available soon on the WRCE web site at <http://www.utmb.edu/wrce/>.

For additional information, please contact Dr. Kimberly Schuenke (kischuen@utmb.edu; 409-747-0766).

Partial support provided by the National Institute for Allergies and Infectious Diseases through the Regional Centers of Excellence for Biodefense and Emerging Infectious Diseases Program and the McLaughlin Endowment at the University of Texas Medical Branch at Galveston.
